Mike,

You wrote a wonderful tribute to Terry. I, for one, miss him a great deal. In 1978, he talked me into running the Christmas Relays around Lake Merced in SF because they were short a person. It was one of the best things I ever did. After that, Bruns and I put on the running miles as a twosome or in a group. Our motto was "We need the miles." Terry was always recruiting runners. He even convinced Harry [Cook] that he needed to run with everybody at Deer Creek; Harry is still running at noon with us. You may remember that Don Stockard and Bruns started the vegetable running club. He was "asparagus." Harry was Rutabaga, Monty [Hampton] was Cucumber, Brian [Edwards] was Parsley, [Warren] Yeend was Eggplant, Rob [Kayen] was Slime Mold, and I was Artichoke. In order to be a vegetable, you had to have run a marathon, which proved that you had had a pre-frontal lobotomy or were a vegetable. There were a few honorary members.... Anyway you get the idea. We all had great fun with Bruns being the organizer and mover. I put some pictures together of our running days which I passed on to Helen [for this memory book—see Running section].

He was a great guy, one that I'll really, really, miss. Les
